 Professional Summary

Laravel Developer with 2 years of professional experience in developing and maintaining scalable web applications and business management systems using Laravel, PHP, and MySQL. Skilled in building REST APIs, implementing backend business logic, designing database-driven applications, and developing authentication and administrative workflows. Experienced in frontend integration using HTML, CSS, JavaScript, and modern web technologies. Familiar with Git, GitHub, Postman, and AI-assisted development tools to improve development efficiency, debugging, and feature delivery. Committed to writing clean, maintainable code and delivering reliable, practical solutions for real-world business requirements.

 Experience

Full Stack Laravel Developer, (Quebix Technology)

Oct 2024 – Present | Surat, Gujarat, India

- Develop and maintain Laravel-based SaaS and business applications, implementing features and workflows based on real-world business requirements.
- Build robust backend functionality using Laravel, PHP, MySQL, MVC architecture, authentication, validation, and business logic.
- Develop and customize modules for inventory, sales, purchase, billing, order management, attendance, and other business operations.
- Design and integrate REST APIs for communication between web applications, admin panels, and external services
- Work with MySQL and Eloquent ORM to manage database relationships, queries, data operations, and application workflows.
- Customize existing applications, troubleshoot production issues, identify root causes, and implement reliable solutions while maintaining existing functionality.
- Collaborate with team members to understand requirements, develop features, and deliver clean, maintainable, and production-ready applications.
